

DESKPACE SYSTEMSOFT-ARG IBERICA

DESKPACE' s RECORD V. 1. 0

This one is the first screen that appears in Deskpace while the program does not register:

To proceed to the record of the same one, simply we will pulsate in the button "To "register" to enter this one another screen:

The program automatically assigns to us a number of identification, which he identifies to our program. Now only we will have to put in touch with the supplier in registro@deskpace.com sending the number of identification, and with the major possible briefness it will be answered us indicating the key to us to be able to register Deskpace (after the client has realized the pertinent payments to the supplier).

The facilitated key is only for a license; it is to say, that alone serves for the number of identification that offers us the program. We will not be able to install Deskpace in other computers with the same key.
